I generate with

Google Flow · Kling · Runway · Higgsfield · Midjourney · Nano Banana · Seedance · ElevenLabs · Melius

Studied

Bachelor of Information Technology
MAHSA University, Malaysia, 2024

I cut

UGC ads · VSL · Hype edits · Motion graphics · SaaS launches · Podcasts · EN and Chinese VO

I build with

Next.js · React · TypeScript · Supabase · WordPress · Playwright · Claude Code

Where I've worked

Senior Video Editor at Shown

UGC ads, hype edits, VSLs, SaaS launch videos and AI ads for brands. I cut for the hook first and the sale second.

InRealLife on TikTok

Ran the channel day to day and got a new video out every single day.

What I make

AI ads

Full ads generated from a prompt, with AI actors, voices, b-roll and product shots.

SaaS launch assets

Launch videos, X thread animations and animated product demos for software companies.

Podcasts and bilingual ads

Podcast clips, plus English and Chinese versions of ads that I write and voice myself.

Social media

Daily content, captions and scheduling. Took one client TikTok to 558 posts.

AI coaching

One on one sessions where I teach my AI ad workflow from prompt to finished ad.

Things I've built

SpeakSure NEXT.JS + SUPABASE

My own take on Google Classroom for paid English courses. Teachers approve students, lessons unlock in order, and it speaks English, Chinese and Arabic.

AbroadNet CLIENT, REACT

A study-abroad site that turns visitors into leads, with an AI chat assistant and a Google Sheets CRM behind it.

Brands I've cut for

VKTRY / FreePrints / RescueMD / Notch / WithCoverage / TodayTix / Trump Footwears / Inside Success / RS Chrono / Analucia Diamonds / MarsMen / Wantable / Meraki Blu / Xnote / Wajo / Buildbetter
